SECRET IN AUTO REPAIR

WHAT DO YOU KNOW ABOUT THE TECHNICIAN WORKING ON YOUR CAR?

Here's what we can tell you about the Technicians at Mighty Auto Pro, and why these things are very important!

1. **Drug Tests, Background Checks and Driver's Records Checks** with high standards are required for everybody on the Mighty Auto Pro Team. After all, your safety, and the safety of your family rest on the quality of repair performed by the Technician working on your car.
2. **ASE Certified** – Our Technicians are all Automotive Service Excellence (ASE) Certified. In our industry there are literally no requirements to call yourself a Technician. Our Technicians voluntarily test and maintain the high standards required by ASE and we have two Master Technicians on staff. The highest level of achievement possible.
3. **Continuing Education** – In today's vehicles technology is changing at lightning speed. It is critical that Technicians keep up on the latest developments. All of our Technicians complete a minimum of 40 hours per year, with many completing much more.
4. **Tool Investments** – Not only does Mighty Auto Pro invest thousand upon thousand of dollars to keep up with state of the art tools, computer programs and software to work on today's vehicles, the Technicians invest in their own personal tools as well at Mighty Auto Pro.

We have quite an amazing Team of Technicians here at Mighty Auto Pro.

Many times, people will ask, "what is your hourly labor rate?". The honest answer is what difference does it make if the Technician working on your vehicle is not properly qualified to perform the job? If the hourly rate is \$50.00, but the Technician is not properly trained and qualified, and does not have the proper tools, it may very well take him 8 hours to do a job that a qualified Technician with the proper tools could do in 2 hours.
